

Excel

Week 3

Why Use Excel?

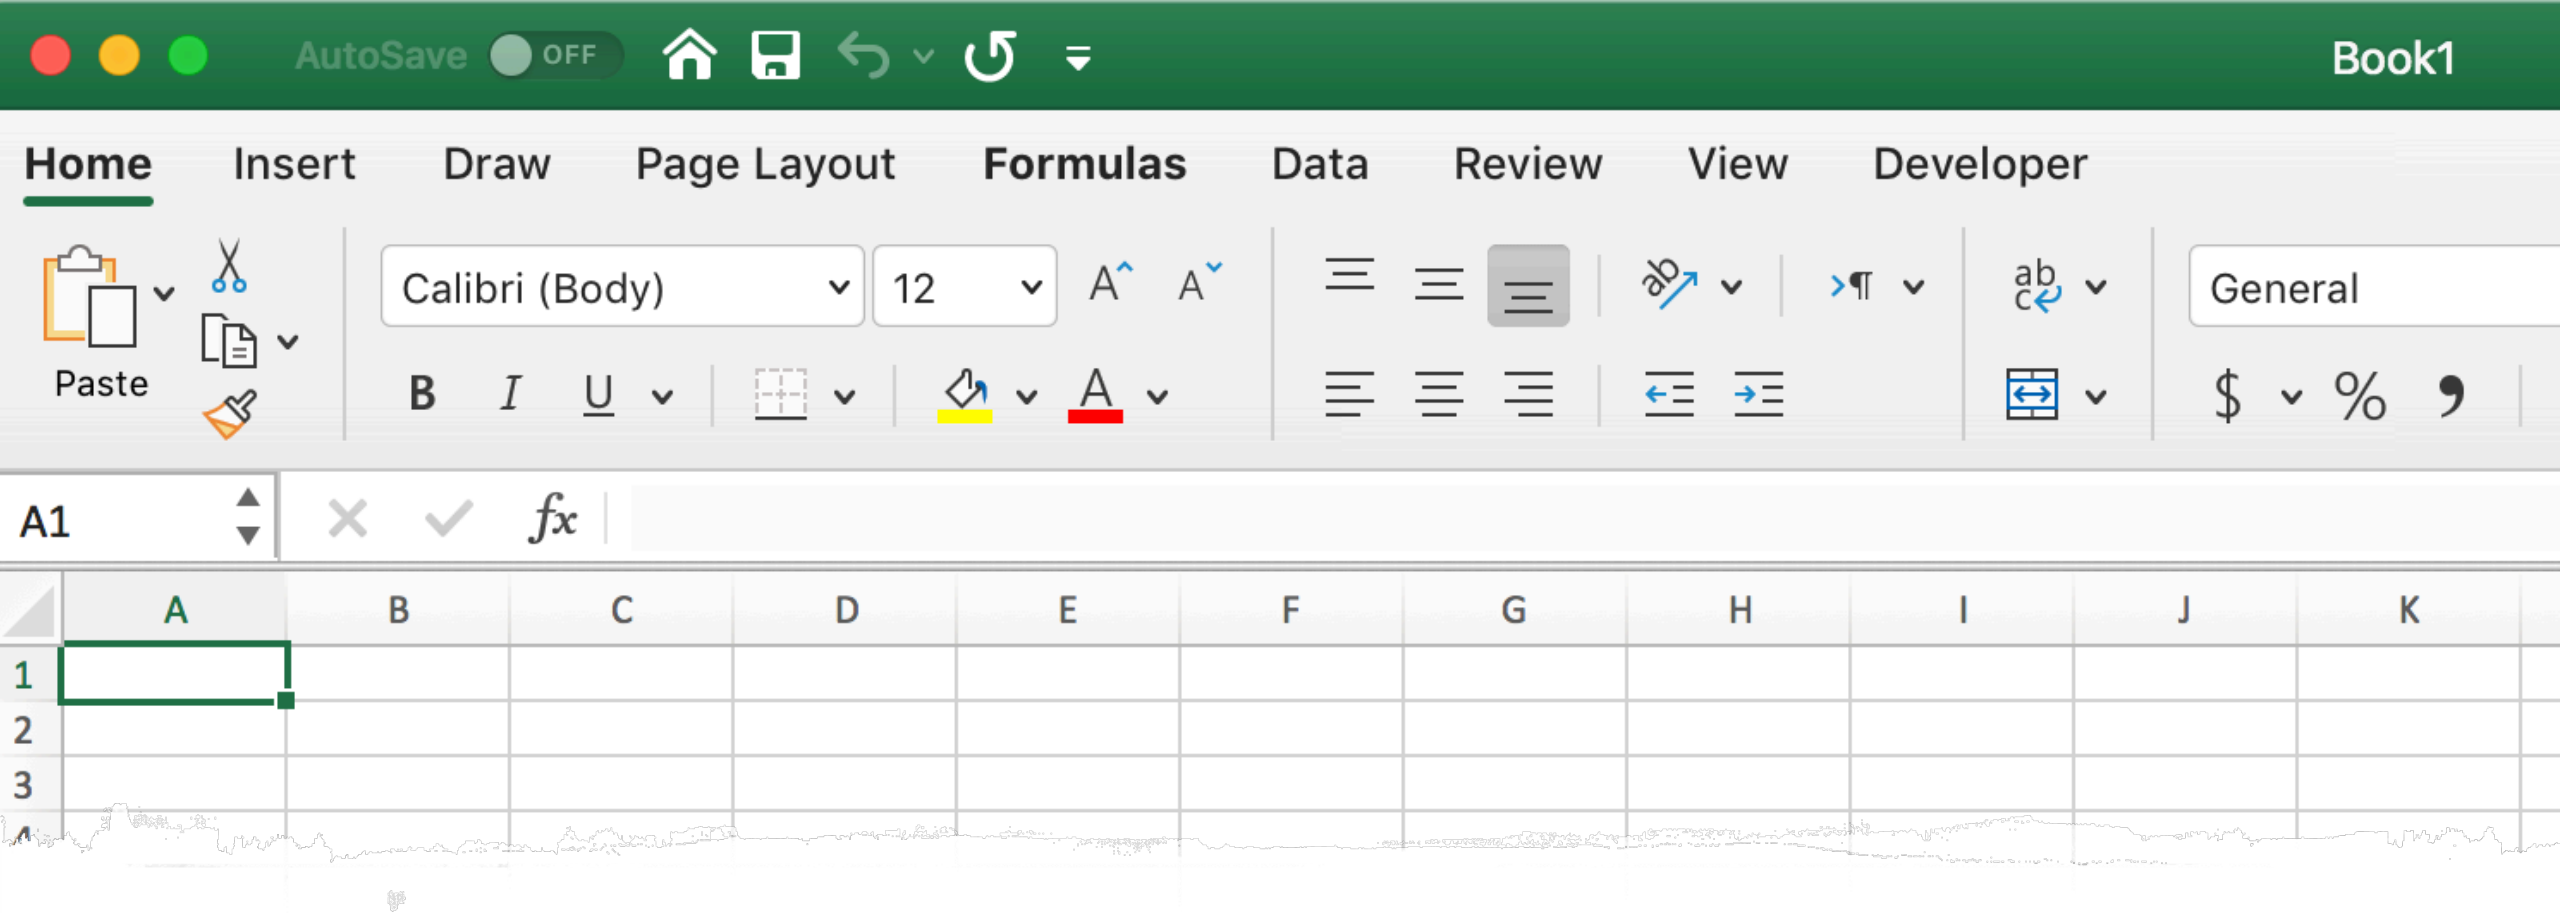

It is widely used in workplaces today.

Released in 1985, it has a long and established history.

Strong support for statistical analysis.

Excel Basics

Foundational Items

- Navigating the ribbon
- Creating a workbook
- Creating sheets

Formatting Cells

- Fonts
- Borders
- Adjusting rows & columns

Pivot Tables

Pivot Tables

Are a data processing technique.

Summarize and organize selected columns and rows in a dataset.

Can be used to create a report and does not alter the underlying dataset or database.

Data needs to be in a table format.

Pivot Tables

Open file
sales_data_sample.xlsx in
Canvas

- Format data into a table
- Examine filtering
- Create a pivot table
- Create a recommended pivot table
- Modify subtotals/grandtotals
- Format values

Sorting/Filtering

Sorting/ Filtering

Please follow in-class instruction for sales_data_sample.xlsx in Canvas

- Sorting column/row labels
- Filtering by selection
- Applying a slicer
- Formatting a slicer
- Report filters

Styling Pivot Tables

Styling Pivot Tables

Please follow in-class instruction
for sales_data_sample.xlsx in
Canvas

- Banded rows
- Pivot table styles
- Layout
